I am an architecture student and a designer with an avid eye for History, Art, and Conservation. Over the course of my academic projects, I have tried to explore various ideas and ways in which architecture can impact an individual and a community. I believe architecture and design are much more than mere spaces and structures, it has got a lot of depth, strong emotion, and a lot of stories to tell.

Over the years, I have tried to understand architecture and connect to it through different media, majorly sketches and strong conceptual ideas which have strengthened my ability to think and visualize. My work is driven by my passion to learn, experience, and become a driving force in this field.

Experience

Intern Architect at DPA Design Studio, Ahmedabad

June 2023 - December 2023

- Worked closely on various hospitality and commercial projects with avid focus on strong conceptualization through various media, majorly sketches and 3-D Models.
- Worked on major Master Planning and Landscape Projects for hospitality and commercial projects.
- Working Drawings for Architecture and Interior Design Projects.
- Handled Client presentations and Publications, content formulation for various magazines and project marketing.
- Designed mood boards for Interior Design projects, presentations for furniture and material selections, closely worked on color palettes and studied color theory in detail.
- Interacted and managed relationships with artisans and vendors.

Design Intern at DPA Design Studio, Ahmedabad

December 2023 - Present

- Worked on project marketing and client presentations.
- Worked individually to conceptualize the rebrand of the firm and plan a social media and marketing structure for the company.
- The concept design for the project brochures and publications for magazines.
