2021  
2020  
2019 - 2023

## PERSONAL STATEMENT

As an architect, I strive to design with a holistic view, along intent to improve any spatial extent for efficiency in terms of resources, with inhabitants as center of any design. I am actively seeking an internship that allows for experimentation and evidence based designing as is the core of the Design Research Laboratory. I am also pursuing my keen interest in urban economics.
