# Hi

I am *Roshini* pursuing degree in bachelor of architecture.

An adventurous and curious individual with a creative outlook, always seeking new ideas and perspectives. As a dedicated reader and thinker, I am constantly learning and evolving, aiming to bring fresh, innovative solutions in every aspect.

I find inspiration in the endless potential of architecture to redefine how we live and interact with our surroundings. I am particularly fascinated by the intersection of built environments and human experience, and strive to integrate new ideas into my work.

This portfolio showcases my work and vision as I continue to explore new ideas and venture beyond in design.
